EDUCATION

Rutgers University <i>B.S. Computer Science, Minor in Data Science Magna Cum Laude Dean's List (2×)</i> Coursework: Data Structures & Algorithms, Databases, Machine Learning, Deep Learning, Computer Security	Sep 2024 – May 2026 GPA: 3.8
Middlesex College <i>A.S. Computer Science Dean's List (2×) Coding Competition Winner President, CS Club</i>	Jan 2023 – May 2024 GPA: 4.0

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, TypeScript, Shell scripting (Bash)
Data & Pipelines: ETL/ELT pipelines, data hydration & cleansing, JDBC, data quality/validation, REST APIs
Databases: Microsoft SQL Server (MSSQL), PostgreSQL, MySQL, MongoDB
Backend & Systems: Java (MVC, JSP/Servlets), microservices, Node.js/Express, message-driven processing, Linux
DevOps & Cloud: Docker, CI/CD (GitHub Actions, GitLab), Git, AWS, GCP, Oracle Cloud, Azure
Practices: Agile/Scrum, SDLC, secure coding, unit testing, code review

EXPERIENCE

Amazon <i>Operations Manager — PNE5, Robbinsville, NJ On-site</i> - Improved Manager-in-Path compliance-tracking accuracy to 98% and reduced site-wide data retrieval and analysis time by 80% to under 90 seconds by developing a regional analytics tool that performed deep operational analysis for 120+ managers across 6 sites N4 Region. - Increased site throughput by 22% and predicted workstation demand with 95%+ confidence by engineering an ML-powered labor-allocation tool that analyzed real-time location, workflow, CPT, and TPH data, auto-aligned associates, and sent personalized scanner instructions. - Automated best-fit work-area recommendations for 1,300+ associates by training an ML model on one month of historical rotation, path qualification, productivity-rate, inferred-time, and safety data; matched each associate login to the role where prior performance was strongest.	Jul 2026 – Present
Oasis Infobyte <i>Data & Application Developer Intern (Remote)</i> - Built data pipelines in Java that ingested, transformed, and loaded source data into a MySQL relational backend using JDBC Prepared Statements, applying MVC architecture for maintainability. - Optimized SQL queries and data-access logic — improved query performance ~30% and reduced runtime/data-quality errors by 25%; participated in Agile code reviews, debugging, and testing. - Investigated and resolved data inconsistencies across sources; communicated technical decisions clearly to non-technical stakeholders throughout the SDLC.	Oct 2025 – Nov 2025
Princeton University <i>Research Assistant — Computational Data Analysis (Princeton, NJ On-site)</i> - Selected as one of ~30 students for Princeton's competitive Transfer Scholars Initiative; conducted research under faculty supervision. - Processed and analyzed complex, multidimensional EKG sensor data using statistical methods to ensure data accuracy and identify physiological patterns. - Built Python data-cleaning and visualization workflows, transforming raw time-series datasets into structured, validated output for university researchers.	Jul 2024 – Aug 2024
Middlesex College CS Club <i>Peer Tutor, CS & Data Structures (Edison, NJ)</i> Mentored 26 students in algorithms, data structures, and programming; led club as President — strong communication and leadership in a collaborative environment.	Sep 2023 – May 2024

PROJECTS

AI Code Reviewer <i>Python, FastAPI, PostgreSQL, REST APIs, GitHub Webhooks, CI/CD</i> - Engineered an end-to-end data pipeline that ingests GitHub PR events via webhooks, processes them through an LLM (Groq API), and posts structured feedback as PR comments within <5 seconds. - Built webhook ingestion with HMAC-SHA256 signature verification; achieved 98.4% delivery reliability and 96% OAuth auth success rate across concurrent requests. - Deployed full-stack app on Vercel + Render with PostgreSQL on Neon; reduced API latency 37% through SQL query optimization and efficient data-access patterns.
Cat Pose Estimation & Behavioral Classification <i>Python, PyTorch, CNN, OpenCV</i> Engineering a two-stream CNN pipeline (DeepLabCut + optical flow) to classify animal behaviors from video; applies PyTorch model training, evaluation, and iterative improvement at scale.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025: Data Science Professional | AI Vector Search | Generative AI Professional | AI Foundations Associate | AWS Solutions Architecture 2025 | AWS Certified Cloud Practitioner | GitHub Foundations 2024 | Harvard CS50 2021
